## **ECOHARMONY: SCHOOLS FOR CLIMATE RESILIENCE project song lyrics written by the students**

### **Change Starts Now**

(Verse 1:) The planet's burning, can't you see?  
It's calling out, to you and me  
Oceans rising, forests fall  
if we don't act, we'll lose it all.

(Verse 2:) Turn off the lights, waste no more  
Pick up the trash, right from the floor  
Ride your bike, don't take the car  
Small steps matter that's who we are

(Chorus x2:) Change starts now  
Yeah, right now  
We take a stand  
We make a vow  
Together strong, we lead the way  
For the Earth, we act today

(Verse 3:) Reuse, reduce, recycle too  
the planet needs the best of you.  
Less plastic and less waste, more green  
Let's build a world that's fresh and clean

(Verse 4:) Don't wait for someone else to start  
the power's there in your heart.  
Step by step we'll make it right  
Together strong, we shine the light!

(Chorus x2:) Change starts now  
Yeah, right now  
We take a stand

We make a vow  
Together strong, we lead the way  
For the Earth, we act today

(Verse 5:) No more talking, time to do.  
The Earth believes in me and you.  
Hands together, hearts as one  
Let's heal the world it's just begun

(Chorus x2:) Change starts now  
Yeah, right now  
We take a stand  
We make a vow  
Together strong, we lead the way  
For the Earth, we act today
